

Basic Information

- Name: Shang Wenlong | Date of Birth: November 4, 1984 | Gender: Male | Native Place: Shanghai
- Phone: +86 18918046351 | Email: dxcqcv@gmail.com
- Tech Portfolio: Github <https://github.com/dxcqcv>
- Online Resume: <https://dxcqcv.github.io/resume/html/index.html>
- Career Objective: Senior Frontend Developer (Focus on React/Next.js/Low-Code/Multi-Platform Development/Node.js/WeChat Mini Program Development)

Core Skills

Skill Category	Specific Competencies
----------------	-----------------------

Frontend Frameworks	React (Proficient), Next.js (Skilled), Vue.js (Skilled), Tailwind CSS (Skilled)
Multi-Platform & Mini Program	Taro, UniApp, Native WeChat Mini Program, React Native (Familiar), Mini Program Performance Optimization
Node.js & Backend	Node.js (Proficient), Express, Koa2, Redis, MongoDB, MySQL, RESTful API Development
3D & Visual Effects	Three.js, R3F, Shader Programming, Large-Screen Data Visualization
Engineering & Quality Assurance	Ts, Redux, Mobx, tanstackQuery, Husky, ESLint, Prettier, Whistle, Jest
Collaboration Abilities	Git, Agile Development, Architecture Design, Module Splitting, Technical Sharing, Cross-Department Requirement Alignment

Project Experience

1. Low-Code Framework Component Enhancement (Oct 2025 - May 2026)

- Scenario: Provide configurable low-code platform for enterprise clients, covering marketing campaigns and internal management systems
- Actions: Extracted common requirements from 50+ clients, designed 12 core business components; implemented permission control and data linkage based on

Next.js+NextAuth+React Query; built backend APIs with Node.js to support component interaction

- Achievements: Enabled 3 business divisions to quickly build 80+ pages, shortened development cycle from 15 days to 5 days, improved efficiency by 67%
- Tech Stack: Next.js, NextAuth, React Query, TypeScript, Tailwind CSS, Node.js

2. Appointment Service Componentization (Jul 2025 - Aug 2025)

- Actions: Abstracted 18 high-frequency business components from scratch, packaged as private NPM package supporting reuse across 3 projects (including mini program adaptive components)
- Achievements: Improved business development efficiency by 30%, component reuse rate reached 85%, reduced duplicate code by 2000+ lines
- Tech Stack: React, TypeScript, NPM Package Management, ESLint+Prettier, Mini Program Adaptation

3. MAC Electronic Greeting Card Mini Program (Sep 2023)

- Scenario: Supported MAC Cosmetics' marketing campaigns, providing personalized e-greeting card creation, voice message, and social sharing functions
- Actions: Developed high-performance animation components using WeChat Mini Program WXS syntax; implemented full-process voice upload/verification/storage, optimized large-file transfer stability; integrated with brand membership system for data synchronization
- Achievements: Peak daily active users (DAU) exceeded 20,000+, generated 100,000+ greeting cards during the campaign, social sharing conversion rate reached 35%, zero major online failures
- Tech Stack: Native WeChat Mini Program Development, WXS Syntax

4. Modular Construction Platform (Jul 2017 - Oct 2017)

- Scenario: Enabled product/operation teams to independently build activity pages (including H5 and mini program pages)
- Actions: Built modular platform based on Vue2+Koa2+MySQL, abstracted 20+ business modules supporting drag-and-drop configuration; implemented backend data management and page generation with Node.js
- Achievements: Reduced development dependency for activity page construction, improved business efficiency by 50%, supported 400+ activity launches (including 100+ mini program pages)
- Tech Stack: Vue2, Vuetify, Axios, Koa2, Objection.js, MySQL, Node.js

5. Personal Project: 3D Interactive Official Website (May 2023)

- Achievements: Developed 3D interactive official website for a large state-owned enterprise, implemented Shader effects, embedded text and music, supported 3D interactive operations
- Tech Stack: React, Three.js, R3F | Source Code: <https://github.com/dxcqcv/abel-portal-source> | Demo: <https://dxcqcv.github.io/abel-portal-show/>

6. Personal Project: Online Word to HTML Converter (Jan 2022)

- Achievements: Supported multi-file drag-and-drop upload, batch conversion, and ZIP download, with cumulative usage exceeding 1000 times (including mini program adaptation solution)
- Tech Stack: TypeScript, React, Mammoth, JSZip, Node.js (Backend Conversion Service)
| Source Code: <https://github.com/dxcqcv/word2html> | Demo: <https://dxcqcv.github.io/word2html/index.html#/>

Other Project Highlights

- Questionnaire Project (Mar 2025 - Apr 2025): Dynamic questionnaire + mini program sharing function, supporting 100,000+ user participation | Tech Stack: React, Node.js
- Mini Program WeChat Store Integration (Feb 2025 - Mar 2025): Compatible with multi-framework mini programs, completed user acquisition authorization for 3 brands | Tech Stack: React, Vue, Node.js
- Inventory Monitoring Dashboard (Jan 2025): Real-time data visualization for 5 warehouses | Tech Stack: React, Node.js
- Customer Service Log Migration (Oct 2023): Serialized 10-million-level Excel logs, improved efficiency by 40% | Tech Stack: Node.js, Redis, MongoDB

Work Experience

1. Eurasia Consultis International. | Frontend Developer | Jan 2026 - May 2026

- Core Responsibilities: Develop Nextjs and tailwind css core components for low-code platform (including mini program components), build Node.js backend supporting services, participate in client requirement reviews and technical solution design
- Key Achievements: Led 3 iterations of component library, supported 80+ page constructions (including 30+ mini program pages), client satisfaction rate of 92%

2. Robert Half Inc. | Frontend Developer | Jun 2023 - Sep 2025

- Core Responsibilities: Maintain global official websites and mini programs for sub-brands (MAC Cosmetics, Bobbi Brown), handle mini program backend APIs and data interaction with Node.js

- Key Achievements: Participated in 5 core mini program developments; MAC Electronic Greeting Card Mini Program reached 20,000+ peak DAU, resolved key issues in voice upload/verification/storage, improved mini program loading speed by 40%

3. Isoftstone Information Technology (Group) Co.,Ltd. | Frontend Developer | Jul 2022 - Apr 2023

- Core Responsibilities: Developing react tech stack with Taro-based real estate mini program, integrate VR house-viewing function, connect real estate data APIs with NodeJs and building Vue+Element-UI backend management platform,
- Key Achievements: Improved backend configuration rate by 50%, increased mini program house-viewing rate by 30%, boosted order intention conversion rate by 15% after VR function launch

4. Ping An Pay Technology Services Co., Ltd., Shanghai Branch | Frontend Developer | Jul 2019 - Jan 2022

- Core Responsibilities: Develop marketing H5s, mini programs, PC portals, and CMS content management systems; build frontend scaffolding; participate in business requirement reviews and technical solution implementation
- Key Achievements:
 - Customized frontend scaffolding, unified technical specifications, improved development efficiency by 40%
 - Developed "Motor Team" mini program (20,000+ DAU) and "Card Collection" mini program (2,000+ DAU), implemented user points and card data management with Node.js
 - Built No-Code platform, supported 400+ activity page constructions (including 150+ mini program pages), reduced repetitive development by 80%

5. Shanghai Guangyuan Labor Services Co., Ltd. | Frontend Developer | Jun 2017 - Jun 2019

- Core Responsibilities: Use the Vue technology stack to complete business development based on design mockups, and create a low-code platform and automated image-slicing tools to accelerate business development
- Key Achievements:

- Automated Image-Cutting Platform Accelerates Business Operations by 50%

6. ENN Energy Services (Shanghai) Co., Ltd. | Frontend Developer | Dec 2014 - Feb 2016

- Core Responsibilities: Develop frontend for Energy Cloud Platform, implement large-screen visualization projects, build front-end and back-end separation architecture
- Key Achievements: Independently completed Langfang Power Supply Station large-screen project (Three.js+Unit3D) supporting real-time data visualization; improved Node.js backend API response speed by 50%

7. Shanghai Puxian Business Services Co., Ltd. | Frontend Developer | Aug 2014 - Nov 2014

- Main Responsibilities: Develop a webpage using jQuery and embed it into a Java JSP for integrated debugging.
- Transferable Skills: Skills in combined Java and jquery development,

8. Shanghai Yutong Translation Co., Ltd. | Frontend Developer | Jan 2012 - Sep 2012

- Main Responsibilities: Modify WordPress code and create web pages using JavaScript, CSS, and PHP based on design mockups.
- Transferable Skills: Skills in combined PHP and JavaScript development, including creating forms and connecting to a MySQL database

9

. China International Talent Development Center Co., Ltd. Shanghai Branch | East China Website Editor | Jan 2011 - Apr 2011

- Core Responsibilities: Creating web pages using JavaScript, Dreamweaver, and Flash
- Transferable Skills: Website Development and Layout and Writing reviews of digital products (logical expression), reporting on trade shows (requirement gathering), and liaising with distributors (cross-departmental collaboration)

Education Background

- Dec 2016 - Jun 2017: Fudan University | Computer Information Management | Bachelor's Degree
- Sep 2014 - Dec 2016: Fudan University | Computer Information Management | Bachelor's Degree (Self-taught, verifiable on Xuexin.cn)
- English Proficiency: PETS-3 (Basic reading, writing, and communication skills)
